

Find out how Tim Squirek's *Organic Green Carpet Clean* can restore the beauty of your soiled carpets—without using harsh chemicals.

by Ann-Marie LaPorta

For the health and safety of his customers and himself, *Organic Green Carpet Clean* owner Tim Squirek cleans carpets using proven techniques that are chemical-free.

"More and more of us are concerned about maintaining a green and healthy lifestyle," Tim explains. "Yet most of us don't consider that cleaning our carpets with traditional harsh chemicals and detergents is endangering the health of our families. Carpet needs to be cleaned to extend its life. With my system, you can keep the colors vibrant while also protecting the ones you love."

"Carpet cleaning can be a win-win situation," Tim continues. "My Organic Green Carpet Clean uses no harmful chemicals. It's an all-natural system that is safe for you, your children, and your pets."

Organic Green Carpet Clean uses only plant-based cleaning agents that are highly effective. These natural cleaning agents are hypo-allergenic, perfume and dye free, and biodegradable. Tim has over 22 years of industry experience cleaning the most challenging carpets around town.

"I will pre-inspect your carpets to determine if there are any problem areas and then decide which is the best way to clean them," he describes. "I will carefully move smaller pieces of furniture because

it's important to thoroughly pre-treat and loosen any soil from carpet fibers."

With Tim's portable machines, cleaning agents and rinse water are heated to an internal temperature of nearly 250-degrees. "I absolutely do not recycle the water and no residues are left when the carpets are rinsed," he insists. "The heat of the water removes the soil, oils, and dirt. Most of all, it disinfects as it cleans." The result is a carpet that's clean and safe to live with.

Tim also offers the "Dry Master System," which helps to dry carpeting in the quickest manner possible. He can also tackle even the toughest stains on upholstered furniture.

"I use environmentally friendly products because I take the health of my clients seriously. I will never compromise my high standard of cleaning," Tim emphasizes. "I make a conscious choice to do business the eco-friendly way."

Go Natural—For Less!

Mimi readers who mention this story may have three rooms cleaned by *Organic Green Carpet Clean* for just \$99. This offer is valid up to a total of 750 square feet and some restrictions may apply.
